### About Romspen

With its origins in the mid-60's, Romspen is one of the largest non-bank commercial/industrial mortgage managers in Canada. Romspen US Mortgage Investment Fund commenced operations on June 15, 2018. The Fund invests solely in the Master Fund, which has a US mortgage portfolio of \$333 million. Our investors include high net worth individuals, family offices, foundations, endowments and pension plans.

### Fund Objective

Romspen's investment mandate is capital preservation, strong absolute returns and performance consistency. Romspen's mortgage investments net returns over the past 25 years have ranged from 7.4% to 10.8% (average 9.2%), with consistent positive monthly performance.

## Notes:

Results shown are for TIG Romspen US Master Mortgage LP (the "Master Fund"), a Cayman Islands exempted limited partnership, and are best efforts estimates, subject to confirmation at quarter end. The Romspen US Mortgage Investment Fund (the "Fund") is one of a number of feeder funds of the Master Fund in a master-feeder structure, and will have certain additional administrative fees and expenses, which will cause the Fund's net returns to be lower than those of the Master Fund. Calculations of compound returns are net of Master Fund fees and expenses. For 2017, the annualized compound return is calculated using the 5 month average. The Trailing 12 Month Performance is calculated using the last 12 months of returns. All returns are annualized and assume monthly reinvestment of distributions. In June 2018, US mortgage loans were transferred from Romspen US Mortgage LP to the Master Fund, and Romspen US Mortgage LP became a feeder fund of the Master Fund.

Market index information was obtained from publicly-available sources and is included to illustrate relative market performance for the periods indicated and not as a standard of comparison. The Treasury HQM 5 Year Corporate Bond Yield Curve seeks to track the yield for corporate bonds; U.S. 3 Month Treasury Bill seeks to track the investment results of liquid securities; and the S&P 500 is a market-capitalization-weighted index of the 500 largest publicly traded companies in the U.S. by market value. These are unmanaged, broadly based indices which differ in numerous respects from the anticipated portfolio composition of the Romspen US Fund, do not reflect any management fees and assume reinvestment of income.
