### Notes:

Results shown are for Romspen Mortgage Investment Fund (the "Fund"), an Ontario trust, and are best efforts estimates, subject to confirmation at quarter end. Romspen figures prior to January 16, 2006 reflect the aggregated pool of individually syndicated mortgages. The indicated rates of return are historical annual compounded returns (or cumulative returns), after deducting management fees and expenses payable by the Fund, and include changes in unit value and assume the reinvestment of all distributions. They do not take into account any applicable sales, redemption, or distribution charges, or income taxes payable by any unitholder, that would have reduced returns. The calculation assumes a fixed historical monthly starting and ending date at the Unit value at such date, and that Unit values are capped at \$10.00. For that reason, they may not reflect an individual investor's actual return for purchases prior to 2018.

The FTSE® Canada Short-Term Overall Bond Index ("Bond Index") is a market capitalized weighted index composed of a diversified range of semi-annual pay, fixed-rate investment grade Canadian government and corporate bonds, with terms to maturity of between 1 and 5 years. The Bond Index returns are based on 24 years of data due to data restrictions. The S&P®/TSX® Composite Index ("S&P®/TSX®") is a market capitalization weighted index of approximately 250 of the largest publicly-traded companies in Canada and is the broadest gauge of the performance of publicly-listed Canadian equities. These are unmanaged, broadly based indices and measurements that do not reflect any management fees and assume reinvestment of income. They should not be considered "benchmarks" for the Fund, as they do not track commercial mortgage investments, which is the Fund's investment strategy. Whenever the Fund's return for a given time period is compared to the performance of these indices over the same time period, the purpose is to compare the Fund's return against the performance of other major Canadian asset classes typically included in an investment portfolio.
